EDUCATION

2023 – 2025

MK BHAVNAGAR UNIVERSITY

- Master of Science in Information Technology
- 80 % (Distinction)

2020 – 2023

MK BHAVNAGAR UNIVERSITY

- Bachelor of Computer Applications
- 77 % (Distinction)

SKILLS

- Laravel
- Python
- FastAPI
- Codeigniter
- PHP
- MYSQL
- React Js
- Node js
- HTML - CSS - JAVASCRIPT
- GIT - CI/CD

LANGUAGES

- English
- Hindi
- Gujarati

SHARAD CHUDASAMA

FULL STACK DEVELOPER

PROFILE

Motivated Software Developer with 3+ years of experience in PHP and Laravel, along with hands-on experience in Python programming. Skilled in developing and maintaining web applications, writing clean and efficient code, and solving technical problems. A quick learner, team player, and passionate about building reliable software while continuously improving my skills.

WORK EXPERIENCE

MSP IT Concepts

APR 2025 - PRESENT

Backend Developer

- At MSP IT Concepts, I lead the backend development of complex, large-scale web applications using Laravel and Vue.js. I work closely with product owners and cross-functional teams to translate business requirements into highly efficient, secure, and scalable solutions. I oversee system architecture decisions, API development, and performance optimization to ensure seamless user experiences. In addition to development, I actively guide junior developers and promote best coding practices across the team.

Key Responsibilities:

1. *Develop and maintain Laravel-based applications*
2. *Build APIs and integrate third-party services*
3. *Optimize performance and database queries*
4. *Collaborate with frontend, QA, and product teams*
5. *Review code and ensure best coding practices*
6. *Guide and support junior developers*

Techmayntra IT Solution

JAN 2023 - MARCH 2025

Senior Laravel Developer

- At TechMayntra, I was responsible for managing full-cycle backend development for multiple enterprise-level projects. I delivered secure, scalable, and modular systems by leveraging Laravel, MySQL, and modern development patterns. My role involved solving complex technical challenges, integrating third-party APIs, and supporting the transformation of business logic into robust application architecture. I also played a key role in improving team processes and onboarding new developers.

Key Responsibilities:

1. *Develop backend features and APIs using Laravel*
2. *Implement authentication, payments, and integrations*
3. *Review code and maintain coding standards*
4. *Assist and mentor junior developers*

PROJECTS UNDERTAKEN

2unboss factory - Job portal and automation software

Technologies: Laravel, Ajax, JavaScript, Html, CSS, jQuery, API, Python, LLM

- Developed a SaaS-based HR management platform that integrates employee analytics, skill-based role matching, performance tracking, and team collaboration features. The system enables organizations to manage employee data, onboarding, and productivity through centralized dashboards and data-driven insights. Built using Laravel and MySQL, it supports scalable and efficient workforce management.

Nexxtap POS

Technologies: Laravel · React.js · Tailwind CSS

- Developed a multi-industry POS (Point of Sale) and KDS (Display System) application for businesses like retail, restaurants, groceries, and service centers. The system allows real-time order management and tracking through WebSockets, ensuring instant updates between POS and KDS.

Tazmin - Online Ordering & Delivery App

Technologies: Laravel, API, HTML, CSS, Javascript, Bootstrap

- Tazmin is a mobile application that allows users to order food from their favourite restaurants through an intuitive interface — no phone calls required. Customers can choose either delivery or pickup and pay by card or cash to the delivery person.

Key Features:

- Key Features
- Restaurant Listing & Menu: Users can browse a wide range of restaurants, view full menus, add extras (e.g., “cheddar on the burger” or “olives on the pizza”) directly in the app. [tazmin.app](#)
- Delivery or Self-Pickup: Users select whether they want the order delivered or will pick it up themselves. [tazmin.app](#)
- Save Location: The app retains customer location history so repeat orders are faster and easier. [tazmin.app](#)
- Favorites: Frequently used restaurants can be saved as favourites for quicker access. [tazmin.app](#)
- Payment Flexibility: Supports payment by credit card or cash to the courier. [tazmin.app](#)
- Business Onboarding: Restaurants or other food businesses can register to join the platform.

Dhamaka Music

Technologies: Laravel, Ajax, JavaScript, API

- Dhamaka Digital is a free music distribution and rights management service. I have contributed to its development to enable artists to release their music globally on platforms like YouTube Music, Apple Music, Spotify, and JioSaavn without any fees. The platform also offers publishing, rights management, and YouTube channel monetization, helping artists protect their digital rights and earn revenue through streaming and downloads. Dhamaka ensures that artists retain full ownership of their music and provides tools to market and manage their content effectively.

Smart parking

Technologies: Laravel, Ajax, JavaScript, jQuery, API

- Smart Parking is a comprehensive parking management system that I developed using Laravel, jQuery, and PHP. It efficiently manages customer parking slots through both the application and admin panel. The admin panel provides features to handle parking subscriptions and facilitates the creation and management of quotations, proforma invoices, invoices, and credit notes. Additionally, the system incorporates robust role-based employee management to ensure smooth operations and role-specific access control across the platform.

Manoj Motors

Technologies: Laravel, Ajax, JavaScript, Html, CSS, jQuery, API

- Manoj Motors is a comprehensive tools industry specializing in motor tools. I developed the platform using Laravel and created an admin panel to manage various operations. Additionally, I implemented Tally API integration within the admin panel for seamless synchronization of financial data. The admin panel allows for the efficient management of customers and orders, providing a streamlined system to oversee business processes effectively.

WBS Tasks

Technologies: Laravel, API, HTML, CSS, Javascript, Bootstrap

- TaskFlow is a task management platform designed for efficient team collaboration and task tracking. Built for both web and mobile applications, it simplifies task assignment, reporting, and monitoring with real-time updates.

Key Features:

- **Team Management:** Create and manage team members with role-based access.
- **Task Assignment & Tracking:** Assign tasks, set deadlines, and track progress in real-time.
- **Reporting & Insights:** Generate detailed reports on task completion and team productivity.
- **Notifications & Alerts:** Keep users informed about deadlines and task updates.
- **Cross-Platform Support:** Fully functional on web and mobile for seamless task management.

Team OS

Technologies: Laravel, Ajax, JavaScript, Html, CSS, jQuery, API

- TeamOS is the premier GPS-enabled sales employee location tracking solution in India, designed to empower businesses with real-time insights into their remote teams' activities. The platform streamlines the monitoring process, allowing me to focus on higher-priority tasks. In today's competitive landscape, having the right tools for salesperson location tracking is essential for maximizing team efficiency and productivity. TeamOS simplifies operations by providing comprehensive monitoring of attendance, work progress, and performance, ultimately saving valuable resources for the company.
